

**ADAM COOKSON**  
**Co-Founder and CEO**  
TekDry International

Adam Cookson co-founded TekDry International in 2013 -- a company that recovers wet smart devices such as cell phone, tablets, computers, watches, cameras, wearables and other devices from moisture intrusion. Adam brings over 25 years of successful corporate start-ups and manufacturing experiences including, technology, wind energy, automotive assembly, synthetic rubber and plastics extrusion molding.

TekDry holds U.S. and international patents (co-invented by Adam) for its drying technologies that are applicable to consumer electronics, medical device sterilization, and other industry verticals.

As co-founder and CEO, Adam's responsibilities include strategic business planning, domestic and international business development, capital formation, investor relations, and leading the TekDry's business team for growth and expansion.

Prior to co-founding TekDry International, Adam was a senior manager for Vestas Wind Systems, a wind-turbine manufacturer. Prior to his tenure with Vestas, Adam held several senior management positions for Toyota Motor Manufacturing as part of the startup of their plants in Indiana and Texas, advising the senior management steering committee on strategic planning and business planning processes, and was responsible for General Motors of Canada's software support for automated guided vehicles. Adam's experience includes international engineering and manufacturing startup experience in Mexico and Brazil as well.

In addition, Adam was selected to participate in Toyota's sponsored leadership development program in lean manufacturing among other development courses. Adam is a certified APQP/PPAP Specialist and holds certificates from the AIAG Supply Chain Institute.

Adam is fluent in Spanish and Portuguese and has strong computer skills in multiple operating systems, simulation software, and data analysis tools.

Adam holds an executive MBA from the University of Denver, and a BS in Electrical Engineering, Kettering University, Flint, MI.

**CRAIG BEINECKE**  
**Co-Founder and Vice President of Sales**  
TekDry International

Craig Beinecke joined TekDry International as a co-founder and vice president of sales in 2014 – a company that recovers wet smart devices such as cell phones, tablets, computers, watches, cameras, wearables, medical devices, remote controls and other devices from moisture intrusion. Craig brings over 22 years of successful skill sets and experience in sales management, sales, project management and engineering field services.

As co-founder and VP, Craig’s responsibilities include establishing agreements with large domestic and international companies to deliver TekDry services, developing referral partnerships with major insurance providers and OEMs and developing marketing initiatives to help build TekDry brand awareness.

Prior to co-founding TekDry International, Craig held senior management positions with Applied Control Equipment, Denver, CO, (a local business partner of Emerson Process Management) where he had P&L responsibilities for the Control Systems business unit. He also held positions as senior controls engineer and project lead for numerous automation controls projects in the brewing, oil & gas, pharmaceutical, mining, power, refining and biofuels industries.

Prior to joining Applied Control Equipment, Craig was a Plant Supervisor for Delta Rocky Mountain Petroleum, Inc., Denver, CO and held various engineering positions with Repap Wisconsin Inc., a paper mill in Kimberly, WI.

Craig holds an Executive MBA from the Daniels College of Business, University of Denver, Denver, CO and a B.S. degree in Chemical Engineering from Michigan Technological University, Houghton, MI.
